Art Unit: 2137

#### **DETAILED ACTION**

Claims 1-6,10-12,16-22, and 40 have been considered.

#### Election/Restrictions

Claims 7-9,13-15,23-25 and 26-39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 3/29/06.

## Claim Rejections - 35 USC § 101

10 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

15

5

Claims 1-6,10-12, and 16-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims, as presented, do not restrict the inventive concept to a tangible embodiment. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

20

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

25

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

30

Claims 1-6,10-12,16-22, and 40 are rejected under 35 U.S.C. 102(e) as being anticipated by Medoff, U.S. Patent Application Publication No. 2003/0088517.

5

15

20

25

As per claims 1,16, and 40, the applicant describes a computer-implemented method for restricting use of a clipboard application in a multi-application computing environment, comprising the following limitations which are met by Medoff:

- a) receiving a copy selection associated with designated content of a source file being displayed by a source application ([0082]-[0087]);
  - b) determining whether the source file is a secured file ([0082]-[0087]);
- c) preventing subsequent usage of the designated content in a destination application via the clipboard application when said determining determines that the source file is a secured file
   ([0082]-[0087]).

As per claims 2-4, the applicant describes the computer-implemented method of claim 1, which is met by Medoff, with the following limitation which is also met by Medoff:

Receiving a paste selection to provide the designated content to the destination application ([0082]-[0087]).

As per claims 5-6 and 21-22, the applicant describes the computer-implemented method of claims 1 and 20, which are met by Medoff, with the following limitation which is also met by Medoff:

Wherein said determining operates to determine that the source file is a secured file based on security information provided by the source application ([0082]-[0087]).

As per claims 10,17, and 18, the applicant describes the computer-implemented method of claims 1 and 16, which are met by Medoff, with the following limitation which is also met by Medoff:

Storing alternate content to the clipboard application in place of the designated content when said determining determines that the source file is a secured file ([0082]-[0087]).

As per claims 11-12 and 19-20, the applicant describes the computer-implemented method of claims 10,16, and 17, which are met by Medoff, with the following limitation which is also met by Medoff:

Storing the designated content to the clipboard application when said determining determines that the source file is not a secured file ([0082]-[0087]).

> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10

5

Claims 1-6,10-12,16-22, and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Mast, U.S. Patent No. 5,881,287.

15

As per claims 1,16, and 40, the applicant describes a computer-implemented method for restricting use of a clipboard application in a multi-application computing environment, comprising the following limitations which are met by Mast:

a) receiving a copy selection associated with designated content of a source file being displayed by a source application (Col 8, lines 18-34; Col 9, lines 22-67);

20

b) determining whether the source file is a secured file (Col 8, lines 18-34; Col 9, lines 22-67);

c) preventing subsequent usage of the designated content in a destination application via the clipboard application when said determining determines that the source file is a secured file (Col 8, lines 18-34; Col 9, lines 22-67).

25

As per claims 2-4, the applicant describes the computer-implemented method of claim 1, which is met by Mast, with the following limitation which is also met by Mast:

Receiving a paste selection to provide the designated content to the destination application (Col 8, lines 18-34; Col 9, lines 22-67).

5

10

. 15

20

25

30

As per claims 5-6 and 21-22, the applicant describes the computer-implemented method of claims 1 and 20, which are met by Mast, with the following limitation which is also met by Mast:

Wherein said determining operates to determine that the source file is a secured file based on security information provided by the source application (Col 8, lines 18-34; Col 9, lines 22-67).

As per claims 10,17, and 18, the applicant describes the computer-implemented method of claims 1 and 16, which are met by Mast, with the following limitation which is also met by Mast:

Storing alternate content to the clipboard application in place of the designated content when said determining determines that the source file is a secured file (Col 8, lines 18-34; Col 9, lines 22-67).

As per claims 11-12 and 19-20, the applicant describes the computer-implemented method of claims 10,16, and 17, which are met by Mast, with the following limitation which is also met by Mast:

Storing the designated content to the clipboard application when said determining determines that the source file is not a secured file (Col 8, lines 18-34; Col 9, lines 22-67).

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6,10-12,16-22, and 40 are rejected under 35 U.S.C. 102(a) as being anticipated by SecurityOptions ("SecurityOptions". December 20, 2001. DC & Co. pages 1-2).

As per claims 1,16, and 40, the applicant describes a computer-implemented method for restricting use of a clipboard application in a multi-application computing environment, comprising the following limitations which are met by SecurityOptions:

a) receiving a copy selection associated with designated content of a source file being displayed by a source application (pages 1-2);

Art Unit: 2137

- b) determining whether the source file is a secured file (pages 1-2);
- c) preventing subsequent usage of the designated content in a destination application via the clipboard application when said determining determines that the source file is a secured file (pages 1-2).

5

15

20

25

As per claims 2-4, the applicant describes the computer-implemented method of claim 1, which is met by SecurityOptions, with the following limitation which is also met by SecurityOptions:

Receiving a paste selection to provide the designated content to the destination application (pages 1-2).

As per claims 5-6 and 21-22, the applicant describes the computer-implemented method of claims 1 and 20, which are met by SecurityOptions, with the following limitation which is also met by SecurityOptions:

Wherein said determining operates to determine that the source file is a secured file based on security information provided by the source application (pages 1-2).

As per claims 10,17, and 18, the applicant describes the computer-implemented method of claims 1 and 16, which are met by SecurityOptions, with the following limitation which is also met by SecurityOptions:

Storing alternate content to the clipboard application in place of the designated content when said determining determines that the source file is a secured file (pages 1-2).

As per claims 11-12 and 19-20, the applicant describes the computer-implemented method of claims 10,16, and 17, which are met by SecurityOptions, with the following limitation which is also met by SecurityOptions:

Storing the designated content to the clipboard application when said determining determines that the source file is not a secured file (pages 1-2).

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Schubert whose telephone number is (571) 272-4239. The examiner can normally be reached on M-F 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel Moise can be reached on (571) 272-3865. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
